

FREE toolkit for Group Risk Connect members

With the average small business losing 40 days each year to staff illnesses, it is no surprise that the UK regularly tops global league tables for sickness-related absence.

Totalling a loss of over £3 billion, sick days are a huge burden, and are particularly damaging to small businesses that simply don't have the necessary resources to cope.

No matter how tempting it may be to sweep sickness absence under the table, as an employer it is vital that you actively manage both ad-hoc and long-term sickness.

Our FREE managing sickness absence toolkit

With all the issues surrounding sickness absence, we have put together an exclusive managing sickness toolkit for Group Risk Connect members.

Our FREE toolkit will include:

A helpful sickness absence guide - This will look at the different types of sickness absence, a typical disciplinary procedure, managing the dismissal process plus much more.

A robust sickness absence policy template - This should be included within your employees' Contract of Employment to ensure staff members know what is expected of them and any consequences they will face should they fail to comply.

The template will cover sick pay arrangements, sickness review meetings, medical certificates required, back-to-work programmes plus much more.
